“Group Oil 2 ++ Petroleum Project Request For proposal “

Diesel Petroleum Refinery Project Expansion / Process Line Upgrade

Project Location: Petroleum Products Company (PPC) Refinery, Al Kharj, Kingdom of Saudi Arabia – 35 miles southeast of Riyadh.

Rex Capital Fund Luxembourg, in partnership with **PPC (Petroleum Products Company)**, are pleased to announce their desire to secure proposals of expressed interest for inclusion on a short list of invited firms to complete a 20,000 square meters refinery expansion project to expand refinery processing line at PPC's existing processing facility in Riyadh.

Existing refinery that produces diesel will be upgraded to produce OIL G2++, which is used for airplane lubricants and plane oil engine lubricants.

This fast-tracked (24-30 month) petroleum processing project expansion provides a unique opportunity for an engineering and construction firm (or team of firms) who possess experience in design and execution of upgrading existing diesel refinery lines to produce G2++ OIL .

All proposals shall include the acquisition of a proven engineering design for the production of diesel petroleum products.

Rex Capital Fund / PPC has secured Hammer Engineering to provide all basic engineering design.

The owners are open to negotiation in this project delivery that expedites the realization of diesel petroleum production that will be transported by land for additional processing in Dubai, UAE (www.PETROL-ONE.com).

Rex Capital will consider both an Engineer – Procure - Construct (EPC) agreement or an EPC – Operate – Transfer agreement for up to a ten year production timeframe. Given the unique nature of this project, the owners welcome respondents to express any desired levels of stakeholder interest in this project.

To express interest or gain more information, please contact John Hachmeh of Rex Capital Fund via email to:
jhachmeh@mnjhigroup.com

“Group Oil 2 ++ Petroleum Project Request For proposal “

Letters of Interest should include a report on your firm's (team) past projects experiences which indicates that your organization is fully qualified to meet this project needs. Please include contact information for a minimum of four (4) past project owner references.

PROJECT SITE

Best location

: Industry city, Riyadh, KSA as same
location with PPC1

- ✓The planned factory will occupy about 40,000m2 including:
- ✓Raw materials farm: $L \times W = 64 \times 64 = 4096 \text{ m}^2$;
- ✓Ware house for products storage and package: $60 \times 120 = 7200 \text{ m}^2$;
- ✓Cargo Area: Located
- ✓Pretreatment and pump house: $44 \times 6 = 264 \text{ m}^2$;
- ✓DCS, MCC and Lab: located
- ✓Boiler, heat transfer oil and air/nitrogen station house: $24 \times 9 = 216 \text{ m}^2$;
- ✓Maintenance house: located
- ✓Main plant area: $L \times W = 100 \times 200 = 20,000 \text{ m}^2$;

Located means as same location with old plant (PPC1)
