SERVICES:

CIVIL WORKS

EP International Company undertakes all specialized civil works, including; construct and maintain infrastructure projects and systems in the public and private sector, including roads, buildings, systems for water supply ,sewage treatment , irrigation and drainage networks, maintenance of housing and industrial units.

In addition we undertake aluminium fabrication,false ceilings works , glass facades works, and MEP and other related work, with quality levels that comply with international standards

LOGISTIC SUPPORT

Our Logistics Division offers a diverse range of logistics services such as air and ocean freight, chartering, customs clearance, inland transport, warehousing and distribution as well as value added services. We ensure clients receive an optimum benefit through our innovation, intensity and integrity.

Locally we handles movement of goods, merchandise & products, from the manufacturing and production units and deliver them to markets, outlets and consumption areas through our fleet of the vehicles.

EQUIPMENT RENTAL

With more than 10 years of operational experience, EP International has cemented itself as the leading equipment rental company in the region. Our ever expanding fleet of rental cranes and heavy machinery are adept at handling even the most challenging and intricate heavy lifting, heavy transport, and temporary energy solutions requirements. As a premier equipment supplier in Iraq we are well-equipped to address the equipment rental needs of all the major industries such as Oil & Gas, Marine, Construction, Petrochemical, and Manufacturing

At EP International, we focus on delivering results with efficiency and safety in mind. In addition to acting as a heavy equipment supplier, we also provide other equipment such as, manlifts, Graders, bulldozers, crushers, vibrators, excavators, hammers, drills, asphalt mixers, loaders, tampers, asphalt planers, fenders, compactors, generators, transformers and welding machines among others.

We also rent Oil and Gas drilling, survey and slotting equipment, and cranes of all kinds such as mobile and crawler cranes, gantry cranes, and asphalt equipment's. Apart from our feasible rental plans along with trained personnel, we also support our local customers with 7/24 customer support and service.

TECHNICAL MANPOWER SUPPLY

EP International's Technical Manpower Supply division was founded with a vision to fuel the dream providing employment opportunities to the local skilled and unskilled labourers. Since then we have been just doing just that and much more.

We cater to the labour needs of diverse industries- civil engineering, building and construction, MEP, Oil and Gas and also transportation and warehousing. Our competitive edge lies in the selection and training system that enables individuals to be part of our team. We also engage in highly professional and long-lasting relationships with clients that makes one of the preferred manpower partner and labour supply companies in Iraq

With the regular training programs, our labour force is adept to use all types of equipment, machines, devices, and machinery, and they are trained to execute the work in a time bound manner within the set limits of safety and quality parameters.

PROJECT MANAGEMENT

We at EP International are synonymous with Prompt, Quality Industrial Project Services to the Clients. We deliver Project oriented Professional services and Technical resources from Planning to Execution to Delivery with the purpose to meet clients commitment to their successful completion of Projects to International Standards. We provide specialized services of installation, testing and commissioning in Electrical, Electromechanical, Instrumentation, Communication, Control system, HVAC, Piping and Utilities and Resourcing and Facility Management. We provide value added services in Industrial Training, Project Management and Construction.

MEP CONTRACTING AND MAINTENANCE

EP International, is one of the leading companies specialized in the field of Electro-Mechanical Contracting with a Special Category Classification. The company offers a full range of services related to all types of HVAC Systems (Heating, Ventilation & Air-Conditioning), Electrical Works, Low-Voltage Systems, Plumbing Works, Fire Fighting Works, Gas/LPG Works, MEP Modular Systems, Retrofit Solutions and many more.

These services include:

- Engineering, Consultancy, Technical Assistance, Maintenance and Procurement.
- Design Development, Prefabrication, Erection and Commissioning of all new installations up to the final completion.
- Full range of Training, Operating and Maintenance Services including the supply of equipment, consumables, spare parts, etc...

EP International has operated servicing both large and small projects in Building Construction and Industrial Applications, backed by a team of highly experienced and qualified professionals

EARTH WORKS AND EXCAVATIONS SERVICES

HEALTH, SAFETY AND ENVIRONMENT POLICY

EP INTERNATIONAL CO. IS COMMITTED TO COMPLY WITH THE HEALTH, SAFETY AND ENVIRONMENT REQUIREMENTS IN ACCORDANCE WITH THE INTERNATIONAL REGULATIONS, AND SHALL TAKE THE RESPONSIBILITY AND PRACTICAL STEPS TO ELIMINATE OR MINIMIZE INJURIES, OCCUPATIONAL HAZARDS, ILLNESS, AND WORK TOWARDS ENVIRONMENT CONSERVATION.

The Company strives to provide a Safe and Healthy Environment to all its employees. To ensure this, the Company has put a HSE Policy in place. The objective of this Health, Safety and Environment Policy is to set forth the guidelines to enable EP International to provide and maintain safe and healthy working conditions for all its employees as well as to maintain a clean environment. The Company is committed to look after human health, operational safety, and environmental protection, which is in the interest of all persons associated with the Company as well as the society in which the Company operates.

- 1 Environment is one of the major concerns of EP International Co. during operation of various projects. In this regard the company strives to implement all the environmental friendly and Green building construction techniques in accordance with the local regulations and latest standards and practices.
- 2 This shall be mainly achieved through Environmental Impact Assessment. Environmental impact assessment shall be done periodically in order to assess the environmental impact of the proposed activity whenever there is a change in activity or a new activity.
- 3 Management Staff of the company has been given the responsibility and the authority to determine environmental aspects of an activity or process, over which necessary control is to be exercised, keeping in view the significant impact on the environment.
- 4 The aspects, which are considered as significant and legal regulatory non-conformance, shall be taken into consideration for establishing the environmental objectives.
- 5 For significant aspects, there shall be effective control & monitoring procedures in order to prevent it from becoming significant.
- 6 The Health and safety of the company employees is the sole mission of management team.
- 7 Zero Incident policy is strictly implemented during company operations to achieve this mission. In order to be successful in this policy the procedure for hazard identification techniques & evaluation of hazards potential & risks is established and documented.
- 8 For all significant hazards, an effective hierarchy of control & monitoring mechanism is applied in order to prevent or mitigate the effect of the evaluated risks.
- 9 These mechanisms will be in the form of procedures, work instructions, monitoring, training... etc., depending on the level of significance and nature of the activities.
- 10 This shall be mainly achieved through Risk Assessment. Risk assessment shall be done periodically and whenever there is a change in activity or a new activity.
- 11 The Management Staff has been given the responsibility and the authority to determine the magnitude of risks and the potential consequences of hazards of an activity or process, over which necessary control is to be exercised, keeping in view the significant risk on health & safety.
- 12 EP International Co. has established Integrated Management system (IMS) as per requirements of the latest Standards and adopts a process approach in the design and documentation of the IMS to ensure smooth operation and achieve company objectives.
- 13 The company operates under process approach where the numerous processes of the company are classified into Business processes and Management processes and interact during operation to achieve the company objectives.
